

LETTER OF INTENT

ESMERALDA ABAD

January 19, 2024

As someone who strives to be involved in their community and helping out others when given the chance, I became interested in SGA. I have seen countless opportunities that SGA presents to current students and incoming students and I would be honored to continue inviting and committed SGA members. As Parliamentarian, I will strive to present ethical and moral opinions for the betterment of Bakersfield College. The ability to be social and adaptable will help me with my performance for this position. I am very passionate about everything I do, and when given the opportunity, I will become very dedicated to this position. Bakersfield College's mission is to strive to be a diverse and inclusive institution, in order for it to maintain this mission, student government must ensure that Bakersfield College maintains and values its mission. Student government is essential to both the students and community as a whole, for it is Bakersfield college that represents its community, student government conserves the core values for its community.
