Clarifying Our Work

As we develop the Guided Pathways System (GPS) at Bakersfield College, we will make the college journey from admission to degree completion for the student truthful and transparent. But it is more than being truthful and transparent—we all (faculty, classified staff, and administrators) will be more proactive in our nudges and interventions for the students in our active guidance of them along the college journey. The GPS is more than truthfulness and transparency; it includes active guidance through the use of completion coaching teams.

Moving forward: Expectations

- Faculty will drive the development of the curricular pathways in the GPS.
- The major (program) pathways we create will not limit the General Education options.
- Inclusion of a program in a meta-major will remain flexible.
- Specific responsibilities for the various members of the completion coaching teams will be developed.
- The GPS will be regularly reviewed and updated in an *iterative* manner to improve the transparency and active guidance in our interactions with the students.
