Enrollment:

The October 4, 2017 report from Institutional Research shows enrollment at BC for Fall 2017 is 3.4% higher than the same time last fall. That is a 241 FTES growth. Our target of 1726 from the 320-IR reconciliation report has our fall 2017 target at 400, spring 2018 at 326 with the summer 2018 at 1000. This shows that we are still below the target although the gap is closing since the last report. The FTES that helped us close the gap were primarily from dual enrollment and inmate education.

Plans are underway to advertise for adjunct faculty for Spring 2018 so we can do a better job managing our waitlists.

State level:

California Community Colleges Present Three Options for Fully Online College to BOG: (see press release from the CCCCO)

Option 1 would use an existing campus to create a statewide delivery system with campus faculty and campus instructional designers creating content. College employer partnerships would be used and new ones developed statewide.

Option.2 would use an existing community college district to host a consortium of colleges that opt-in to collaborate on FLOW, with faculty coming from the participating colleges. The host district would employ or contract with instructional designers as well as develop employer relationships.

Under option 3 a new community college district would be formed and operate under the CCCCO which would hire leadership for the competency-based program. Selected faculty would work with the new district's instructional designers, and customize student services.

Some dates to calendar:
