- **SATELLITE CAMPUSES IN DELANO AND DOWNTOWN BAKERSFIELD**

**The 12 priority projects will occur over a timespan of 6 years and will impact 3 campuses.**

The transformation of Bakersfield College centers around 10 priority projects. These projects are a combination of buildings ranging from academic to athletic, as well as some site improvements such as parking. The 10 priority projects will occur over a timespan of approximately 6 years and will impact 3 campuses.

The following pages show an outline of the program for each priority project. Each page describes the vision for the associated department(s) or campus, how the program ties into the Educational Master Plan, the College need, and a brief overview of the types of spaces, their configuration, and how this aligns with the total project cost.

**1. Veteran Resource Center**

This building will serve veterans both on and off the campus. The project is currently in design and will start construction soon.

**2. ABC Building**

This building will be the new campus center. The project is currently in design and will start construction soon.

**3. Science & Engineering Building**

This building is an all new academic facility consisting predominantly of flexible lab space and classrooms.

**4. Agriculture Building**

This project is an academic area, consisting of four separate, newly-constructed facilities: one main building, a shop, and two greenhouses.

**5. Combined Gym & Field House**

This is a combined facility that houses functions for both the gym and field house. It is partially a renovation and partially new construction.

**6. Memorial Stadium Upgrades**

This project is a series of updates to the existing stadium and a reconfiguration of the track and Field.

**7. Welcome Center**

This project seeks to create a “front door” for the campus. The renovated building will house various student services, particularly those aimed at incoming students.

**8. Center for Student Success**

This project seeks to create a central study and classroom area on the campus.

**9. Delano Learning Resource Center**

This project is located on the Delano Campus and is a new facility that will consist of classrooms, a library, and offices.

**10. Arvin General Education Center**

This project will be located on the newly established Arvin Campus. The new facility will consist of classrooms, a library, and offices.

**11. Parking & New Entry to Campus**

Site improvements on the Panorama Campus, including a new surface parking lot and a new vehicular entrance off of Panorama Drive.

**12. Public Safety Building**

A new facility on a new site that will be used by Law Enforcement and Fire/EMS for training and certification.
